

FOR IMMEDIATE RELEASE

Washington DC, USA / Troy MI, USA, August 1, 2025 / PRESS RELEASE/ 360Healthcare™ Device Division and Carpatians Manufacturing announce a new joint venture partnership to enhance, make accessible and resuscitate the USA healthcare innovation small business and small cap market. “First joint venture of its kind in USA healthcare medical device products and service market, it stands to provide cost effective yet uncompromised prototyping and mass manufacturing service to the single small entity clinicians, physicians, scientists, and researchers in USA and Israeli territories” highlights Prof Dr Claudia C Cotca DDS MPH.

The joint venture partnership creates a service package of Trade Secret and IP SafePlace™ Logic of Excellence LoE™ process, where healthcare professionals can come and receive industry expert consulting in healthcare device open markets. Consulting features can incorporate industry standards and regulatory policy, device performance analysis and optimization, market penetration strategy, prototype proof of concept, mass production and more. Simultaneously, “the joint venture further protects clients from having to experiment already pressure bound budgets, and required best practice scrutinized validation of manufacturing partners” says Marcus Popa, TPM of Carpatians Manufacturing “which are ready and eligible to expeditiously provide excellence in service and competitive market price while trusted to protect sensitive IP, Trade Secret, and proprietary products. A trusted industry voice in Michigan for 26 years leading Carpatians Manufacturing, CEO, John Popa reports on the historic to present continued high demand of his exclusive quality in creative support to optimize client navigation to market ready product.

To support healthcare technologies and devices open markets, 360Healthcare™ Device Division joint venture is further promoting visibility and exposure of USA open market standards by extending its reach to the international Israeli marketplace.
